

THE TABLE IPTV

Music Video Acquisition & Submission Guidelines

The Table IPTV is a self-hosted, not-for-profit, 24/7 channel streaming independent music videos and curated programming, one continuous live feed — no scrubbing, no algorithm, no ads. We're always looking to feature more independent artists and filmmakers in our rotation. If that's you, here's how to submit.

What We're Looking For

- Independent or DIY music videos of any genre.
- Official videos, or fan-made videos with the artist's explicit permission to air.
- Full-length tracks preferred over short clips or teasers.

What To Include With Your Submission

- Artist / band name
- Track title
- Video file, or an unlisted download link (Google Drive, Dropbox, WeTransfer, etc.)
- A Bandcamp link (or other direct artist support link)
- Any relevant context: release date, genre, socials, etc.

Technical Notes

- Preferred format: MP4 (H.264), 720p or higher.
- Please name your file exactly as: **Artist - Song Title.mp4** — this naming convention is what powers the live "Now Playing" display and automatic Bandcamp linking on the channel, so accuracy here matters.
- If possible, avoid videos with large burned-in watermarks or social handles covering the frame.

Rights & Compensation

You must own the rights to the submitted content, or have explicit permission from the artist to air it. This channel is currently a self-funded, not-for-profit proof of concept — there is no monetary compensation at this time. However, every "Now Playing" title on the channel links viewers directly to the artist's Bandcamp page, sending real support their way. You may request removal of your content at any time.

How To Submit

Email your submission to the address below with the subject line **"Video Submission: Artist - Song Title"** and include everything listed above.

tableiptv@gmail.com

Thanks for supporting independent music and keeping this a place worth tuning in to.
